

Agenda

- 1. What types of monitoring are we talking about?
- 2. Monitoring and Audits what's the difference?
- Practical Guidance the «How To?» for planning, communications
- 4. Reporting What to do after the monitoring exercise is finished?
- 5. Overview of APR monitoring reporting

What do you think about when you hear the word *monitoring*?

What is monitoring?

Monitoring is the observation of implementation, in order to:

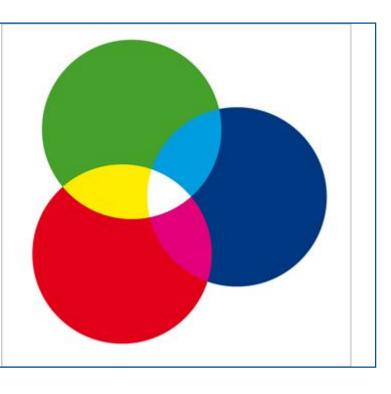

Types of monitoring

Risk-based: oversight of projects/programmes based on perceived level of risk

Compliance-based: oversight of project/programmes for the purpose of checking if they are implemented in compliance with the rules

Results-based: oversight of projects/programmes for the purpose of checking if they are progressing towards the planned results

Not mutually exclusive

see pages 35-38 of the Results Guideline

 verify progress toward agreed outcomes and outputs; ✓ identify potential problems in a timely manner In the second second

 systematically appraise efficiency of fund use check if management control systems are applied verify legality of expenditure

Monitoring vs Audits

Define and analyse the problem: Stakeholder consultations

> Define results and theory of change: Concept Note

Contract and implement projects Programme agreement

Monitoring information – where does it come from?

Project Promoters' reports

E-mail or phone calls

Focus group discussions

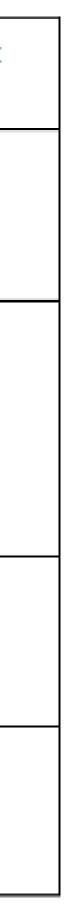

Site visits

Monitoring planning – results framework

Number	Expected programme results	Indicator	Unit of measurement	Source of verification	Frequency of reporting	Baseline value	Baseline year	Target value
	Enhanced gender equal opportunities in the labour market	Number of companies applying gender equality instruments	Number	Project promoters' records	2022 and then annually (APR)	0	N/A	10
Outcome 1		Number of study programmes officially applying the guidelines for integrating gender equality as a quality criterion	Number	Survey results	2022 and then annually (APR)	0	N/A	5
		Share of boys in the target group exhibiting changed understanding of masculinities ¹	Percentage	Project promoters' records	2024	N/A	N/A	80%
Output 1.1	Workplace-related gender equality	Gender equality index for public or private employers developed	Binary	Copy of the index	Semi- annually	No	N/A	Yes

Step 1: Think about what needs to be done practically to report on an indicator

Step 2: What types of monitoring activities are needed? Phone checks, regular email contact, site visits, etc.

Page 37 of the Results Guideline

If considering a site visit:

- Does a project have a significant impact on meeting the objective? Is the project particularly innovative?
- Projects exceeding a certain euro value.
- For programmes with a large number of projects (30 or more) establish a system of random sampling
- Projects or programmes deemed to be at high risk

Step 3: Establish a monitoring plan

Project name	Monitoring action	Planned timing: Q1, Q2, Q3, Q4	Criteria for monitoring (especially for site visits)	Risk issue with the project (if applicable)	Comments	Contact details
National – Disease prevention programme for communities at risk	Visit with project promoter in Capital City	Q2 – May	The project is vital to the success of the overall programme	The project is at financial risk and has management risks	Mr. xxx should be contacted in April to arrange meeting	Mr. xxx lives in the Capital with phone: 58- 62-00-00- 00
Eastern Region of X: upgrade of local clinics	Regular monitoring of payment claims	Throughout 2018	No site visit envisaged in 2018	There is a low financial risk of local towns' budgets	None	None
National – school fitness programmes for teenagers	Random site visit to 2 schools participating in project	Q4	Since this is a large and important programme for X, a minimum of 2 schools should be checked	No risks identified as yet: random monitoring	During Q3, select schools for monitoring	Project Manager is based in Y City
	name National – Disease prevention programme for communities at risk Eastern Region of X: upgrade of local clinics National – school fitness programmes	nameactionNational –Visit with projectDiseasepromoter inpreventionCapital CityprogrammeCapital Cityforcommunitiesat riskEasternRegion of X:Regularupgrade ofpayment claimslocal clinicsRandom siteNational –Random siteschool fitnessparticipating in	nameactiontiming: Q1, Q2, Q3, Q4National – Disease prevention programme for communities at riskVisit with project promoter in Capital CityQ2 – MayEastern Region of X: upgrade of local clinicsRegular monitoring of payment claimsThroughout 2018National – school fitness programmesRandom site visit to 2 schools participating inQ4	nameactiontiming: Q1, Q2, Q3, Q4monitoring (especially for site visits)National - Disease prevention programme for communities at riskVisit with project promoter in Capital CityQ2 - MayThe project is vital to the success of the overall programmeEastern Region of X: upgrade of local clinicsRegular monitoring of payment claimsThroughout 2018No site visit envisaged in 2018National - school fitness programmes for teenagersRandom site visit to 2 schools participating in projectQ4Since this is a large and important programme for X, a minimum of 2 schools should be	nameactiontiming: Q1, Q2, Q3, Q4monitoring (especially for site visits)the project (if applicable)National - Disease prevention programme for communities at riskVisit with project promoter in Capital CityQ2 - MayThe project is vital to the success of the overall programmeThe project is vital to the success of the overall programmeThe project is vital to the success of the overall programmeThe project is at financial risk and has management risksEastern Region of X: upgrade of local clinicsRegular monitoring of payment claimsThroughout 2018No site visit envisaged in 2018There is a low financial risk of 	nameactiontiming: Q1, Q2, Q3, Q4monitoring (especially for site visits)the project (if applicable)National - Disease prevention programme for communities at riskVisit with project promoter in Capital CityQ2 - MayThe project is vital to the success of the overall programmeThe project is financial risk and has management risksMr. xxx should be contacted in April to arrange meetingEastern Region of X: upgrade of local clinicsRegular monitoring of payment claimsThroughout 2018No site visit envisaged in 2018There is a low financial risk of local towns' budgetsNoneNational - school fitness programmes for teenagersRandom site visit to 2 schools participating in projectQ4Since this is a large and important programme for X, a minimum of 2 schools should beNo risks monitoringDuring Q3, select schools for monitoring

Step 4: Organisation of Monitoring Site Visits

 \checkmark Prepare the project promoter well in advance about monitoring

(note: Project Promoters are partners, not adversaries!)

 \checkmark Coordinate with stakeholders, so the monitoring goes as well as possible

✓ Prepare site visit report

✓ Circulate findings

What does a monitoring site visit report look like?

Monitoring Report - Suggestion for a reporting template – report will ideally not exceed 15 pages

(1 cover page to include the information below)

Programme (number and title) Programme Operator (name of person(s) representing the PO) Visited projects (numbers and titles) and date of monitoring

I. Description of how the monitoring was conducted (1/2 to 1 page) This section refers to any special methods used (if relevant) for the monitoring. Also, list of contacts made, with the dates of meetings / monitoring visit, as well as any additional documents used for analysis or research,

II. Findings (Max 10 pages)

In this section, address each key question from the terms of reference for the monitoring. Add any other relevant findings you find important.

III. Stakeholders' comments (Max 1 page)

In this section, please add any relevant comments you might have been given by the project promoters, and any other interviewed stakeholder.

IV. Recommendations and Lessons learned (Max 2 pages) Refer back to the key questions and provide your conclusions and recommendations – also related to any current or potential future risks to implementation and measures to mitigate them. Add views on lessons learned that should be taken into account for continued implementation or future grant funding in this area.

A section which allows for data aggregation across projects, such as:

Scale 1-4

The project is on track to achieving its results (with 1 as lowest and 4 as highest)

Yes/ no

The project is considered to be at risk and should be monitored again in _____ (date)

Step 5: Define follow-up actions

Step 6: Establish a monitoring reporting system

Step 7: Report on monitoring findings in APR

What we typically received in APRs during FM09-14

✓ **Huge** focus on compliance

✓ Some minimal focus on risk

✓ Very little on results

to achieving the results, with less focus on compliance.

Please maximise APR information related to results – and/or risks

What we typically received in APRs during FM09-14

"A number of **17** on-site monitoring visits were carried out during 2016 and **110** progress reports were submitted by project promoters out of which **91** have been approved at the end of 2016.

The monitoring tools used for the projects are the following: a) **administrative monitoring** - is done based on interim progress reports and final project reports, ad hoc reports, documents describing the implementation at project level, e-mails, phone calls, other relevant documents, etc.

b) **on-site monitoring visits** – performed by the PO's personnel or/and by external experts, if specific expertise is required in order to verify the compliance with technical parameters described in the project.

The PO considers that awarding lump-sums to small projects in order to reduce the administrative burden of monitoring all the expenses in this type of projects is a lesson learnt within the monitoring process."

What we want to see in FM14-21 in the APR

 Type of monitoring you carried out (results-based, risk-based, compliance-based)

Quality of key (project) activities implemented

Any promising practices or weaknesses/risks found

- Quality of (project-level) systems in place to document these results

Do you have projects you already know face some risks? What is the monitoring plan for them?

Why is monitoring important?

- It is an excellent risk mitigation tool
- Develops a status overview
- Check progress towards indicator targets
- Identifies promising practices
- A good excuse for NFP + PO/FO communication

Monitoring is the responsibility of both PO/FO and NFP

Monitoring is an in-depth analysis of an irregularity reported

Surprise monitoring visits are a good idea

PO needs to submit the monitoring plan in the APR

We should do more results-based monitoring
